

# AMARAPU MANIKANTA MANOJ KUMAR

+91-7989344419   manojamarapu@gmail.com   ManojAmarapu   Manoj Amarapu   India

## OBJECTIVE

Final-year Computer Science student with hands-on experience building scalable, production-grade software solutions across full-stack environments. Skilled in designing modular applications and implementing secure backend systems. Passionate about writing clean, maintainable code and solving complex engineering problems.

## EDUCATION

**Bachelor of Technology (B. Tech) in Computer Science and Engineering**, Ramachandra College of Engineering

2022 – 2026 | Eluru

## SKILLS

**Programming Languages:** Python, Java, C, C++, JavaScript  
**Frontend Development:** React.js, HTML5, CSS3, Tailwind CSS  
**Backend Development:** Node.js, Express.js, RESTful APIs  
**Databases:** MongoDB, SQL  
**Cloud Platforms:** Google Cloud, IBM Cloud  
**Tools & Version Control:** Git, GitHub, VS Code

## PROJECTS

### Location-Aware Demographic Networking Platform

Engineered a real-time proximity-based networking platform using the MERN stack, enabling sub-second location-aware clustering across dynamic user sessions through MongoDB geospatial indexing and real-time low-latency messaging via Socket.io with secure OAuth-based REST API authentication.

### HealthAI Insight – Intelligent Healthcare Advisory System

Designed a React-based healthcare intelligence platform utilizing Jaccard similarity scoring for symptom analysis, confidence-ranked predictions, interactive Recharts dashboards, and modular service-layer architecture with optimized client-side state management.

### FlavorForge – AI-Powered Recipe Generation Platform

Architected a full-stack recipe generation application using React, TypeScript, and MongoDB, enabling real-time ingredient-based query processing across authenticated user sessions, persistent recipe storage, and globally synchronized favorites across multiple user flows within a production-grade UI.

## INTERNSHIP EXPERIENCE

### Google Cloud Internship – Generative AI Applications (2025 | 120 Hours)

Engineered AI-driven application workflows using Google Cloud Generative AI APIs, implementing prompt optimization strategies and structured API integrations across end-to-end cloud-based pipelines for intelligent automation use cases.

### AI Development Intern – Vault of Codes (2024 | 1 Month)

Designed an AI-powered Recipe Generator leveraging structured prompt engineering techniques to enhance response consistency and integrate intelligent features across modular, component-based web application architecture.

### IBM Cloud Internship – Applied Generative AI (2025 | 2 Months)

Developed a Health Advisory AI solution using IBM Cloud tools, incorporating structured input validation and severity-based recommendation logic to deliver context-aware healthcare insights across multiple advisory scenarios.

## ACHIEVEMENTS

- Qualified GATE 2026 (Graduate Aptitude Test in Engineering)
- Secured 2nd Place in College-Level Group Discussion Competition.
- Shortlisted for IIT Chanakya Fellowship 2024 through competitive selection.
- Represented district-level hockey team.
